

5-Minute Methods Plan Presentation

PA 604: Methods of Analysis in Public and Urban Affairs (Fall 2023)

5 points

Due: October 24, 2023

Overview:

For this assignment, each student will be given up to 5 minutes to present their methodological plan for answering their research question. Think of this presentation as a super-brief TED Talk. After you present, we'll have 5 minutes for clarifying questions/suggestions to help you refine your methodological plan of analysis.

Prior to our class meeting during the week of October 24, 2023, be sure to share your slide (via Google Slides) in the URL submission for this assignment.

Requirements

You will use a **maximum of one slide**. Organize/design the slide as you see fit. Make sure to include anything you think is pertinent, but do not fill the slide with text and do not use full sentences. When presenting, be sure to include and discuss the following:

- Reintroduce yourself. Also, remind us of your research question and the independent and dependent variables? (include in slide)
- Describe what specific method you plan to use to answer your research question (e.g. experiment, survey, secondary data, interviews, ethnography, etc.)
- What will the data/observations look like? If you're using secondary data, briefly describe the data set.
- Describe how independent and dependent variables are measured.
- How do you propose to analyze the data?

Grading

You will be graded on whether or not the above items are addressed.
